

Digital Marketing – Online Full-Time

This full-time program is 20 hours per week

PROGRAM OBJECTIVES

Digital Marketing Specialists work on developing the strategies used in marketing a company's product(s) or managing an organization's image and online, using various techniques and tools such as social media. The Digital Marketing program provides students with foundational courses in Microsoft Office along with the core essential skills and knowledge in the major areas of the field, including email marketing, search engine optimization, search engine analytics and social media platforms and strategies.

CAREER OPPORTUNITIES

Upon completion of this program graduates will be eligible for employment in a wide cross-section of businesses and organizations which have an online presence. These include retail companies, manufacturing companies, logistics companies, engineering consultancies, organizations in healthcare, and management consultancies.

PREREQUISITES

Grade 12 or equivalent.

TECHNICAL REQUIREMENTS

Students require a Windows OS (PC) based computer and high-speed broadband internet connection. It is the responsibility of students to ensure they have access to a reliable internet connection and functioning PC: a lack of internet connection or PC will not be considered an acceptable reason for non-completion of course work.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

PC minimum requirements:

- Windows 8 or newer (Windows 10 preferred)
- 1.6 gigahertz (GHz) or faster 2-core, 4GB RAM, 4GB free HD
- Various web browsers may be required to participate in coursework, i.e. Firefox, Chrome, Edge. Internet Explorer is not recommended.

If you have an Apple (Mac):

- Compatible operating systems include OS X
- Web browsers supported include Firefox, Chrome or Safari

Your computer must be equipped to view multimedia presentations (video and audio) with speakers/headphones and a webcam and microphone (either integrated or USB) to participate using web conferencing software like Microsoft Teams or Adobe Connect.

While mobile devices may allow some participation in an online course, functionality may be limited and they are not guaranteed to meet all your coursework needs. We recommend students do not attempt assignments or quizzes when using a mobile device, such as a smartphone or tablet, due to compatibility issues.

As an active registered Eastern College student, you will receive licensed access to Microsoft Office 365 at no additional cost. Individual courses may have additional software requirements such as programs for playing audio or video, or a specific software application such as Excel. In some courses, it may be necessary to install specific software used in the course on your computer.

Digital Marketing – Online Full-Time

This full-time program is 20 hours per week

EXAM PROCTORING

While studying online, there will be several courses that will require a final exam or assessment that is proctored to ensure academic integrity is maintained. Students will have two options:

Option 1 – students complete the exam from home with remote proctoring. Students will be recorded and observed during the exam using Proctorio remote exam proctoring. Students must write the exam on the computer that meets the minimum system requirements as outlined above.

Option 2 – student may come in-to any Eastern College campus and write the exam in person. If you would like to write the exam in person, you will need to schedule this time in advance with your instructor.

GRADUATION REQUIREMENTS

A student must obtain an overall grade, in each module of at least 70% in order to graduate and receive a diploma - A student must complete all requirements of Student Success Strategies and Career Planning & Preparation modules.

COURSE DESCRIPTIONS

Student Success Strategies

In this orientation module, emphasis is placed on thinking about achieving success from Day One. This module stresses the importance of developing non-technical skills to enhance personal, academic, and career success. This includes understanding learning styles and honing practical study skills, such as memory, reading, note- and test-taking techniques. Personal exercises will focus on teamwork, decision making and problem-solving skills, setting SMART goals and maintaining a positive attitude; techniques for managing change, stress and conflict will also be explored.

Computer Fundamentals

Through a combination of virtual training and critical thinking, this course examines the role and use of technology in today's workplace. Emphasis is placed on those computers outfitted with the Microsoft Windows 10 operating system. Students will review basic computer components, Windows usage, file management, common applications, navigating and searching the web, and staying protected and safe while using a computer. Students will also start to hone their keyboarding skills through drills and timed exercises.

Microsoft Word Part 1

In this course, students learn a comprehensive set of skills in Microsoft Word, including formatting text for layout and appearance, formatting document sections, and using styles. They also learn how to create and edit header/footer content, insert and format tables, graphics and pictures, and work with templates and themes. The course consists of a combination of virtual training using simulations, as well as projects and exams using the desktop software.

Microsoft Excel

This software lab module consists of online training and assessment in Microsoft Excel. Students learn a comprehensive set of skills, with coverage including creating, formatting and printing worksheets, creating simple and advanced formulas, using mathematical, logical, statistical and financial functions, creating and modifying charts and pivot tables, and using data tools. Students will be evaluated through a variety of assignments, projects, quizzes and exams in addition to their participation throughout the course.

Microsoft PowerPoint

This software lab module consists of online training and assessment in Microsoft PowerPoint. Students learn a comprehensive set of skills centered around the creation of attractive, professional-looking presentations. Students learn how to effectively use and format animations, transitions, pictures, audio, video, charts and tables, as well incorporate speaker notes and annotations into their presentations.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

Microsoft Outlook

This Microsoft Outlook course is created for students to build and validate the skills businesses need to succeed in today's information economy. It also provides students with the skills and knowledge they need to use to effectively manage e-mails, contacts, calendars, and tasks. Outlook has become the corporate standard electronic personal organizer. These are the foundational skills needed to communicate using Outlook in a variety of positions within an organization. This course is computer intensive and demands basic computer proficiency and a basic understanding of e-mail software. Students are expected to make arrangements to meet proficiency needs.

Advanced Microsoft Excel Skills

In this course, students learn more complex Microsoft Excel skills including functions, data manipulation, templates, advanced formulas and functions, and analysis tools.

Introduction to Marketing

In this course students will learn and understand the importance, impact and role of marketing and marketing activities, and the internal and external factors that will impact a marketing plan. Students will learn how to effectively plan marketing activities strategically, based on conducting marketing research. Students will learn how to identify target customers and their needs.

Digital Marketing Foundations

This course will give students a solid foundation in the strategic, tactical and creative essentials of Digital Marketing. Students will be introduced to many core concepts related to marketing communications, learn the fundamentals of digital marketing and how it's different from traditional marketing, as well as introductions to budgeting and its considerations. Students will have the opportunity to create a brand style guide, and an analytics dashboard.

Content Strategy

Content is at the core of all marketing activity. In this course, students learn how to plan content marketing, how to develop content that works well for the target audience, and how to measure its impact.

Writing for Online Success

In this course, students will understand how the digital world is affected by writing. Additionally, they will understand how to structure their writing so that online readers will remain engaged until the end of the article. Students will also learn the difference between copywriting and content writing.

Email Marketing

Email is an effective marketing channel, especially at the conversion and retention stage of the customer journey. In this course, students learn how to create an email marketing strategy, create and execute email campaigns, and measure the results.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

Digital Marketing – Online Full-Time

This full-time program is 20 hours per week

Social Media Platforms and Strategies

Social media technologies continue to transform interactions between businesses and their customers, providing an opportunity for consumers to voice their opinions and influence brand perception. In this course, students will learn how to use social platforms such as Facebook, Instagram, Twitter, and Snapchat to identify influencers, deliver targeted content, and understand the basic concepts of measuring success.

Online Community Management

This course allows students to understand the importance of cultivating, nurturing, and engaging with their audience as part of a larger content strategy, but more importantly, from a practice of real time engagement. Community managers are community advocates and brand evangelists. They have perceptive communication skills, shape editorials and gather community input for future products and services.

Website Content Management

In this course, students will gain an understanding of the changing nature of website design and viewing (on large screens, Smartphones and everything in between). Students will discuss the ways in which digital marketing professionals are adapting to the changing nature of web design and how to manage a complex interactive media project. Learners will become familiar with the required steps in building a functional website incorporating graphics, video, and other marketing tools. Examining aspects of website and data security, students will become familiar with e-Commerce, content marketing, blog and social media posts, plug-ins, video channels, podcasts, and playlists as marketing tools.

Fundamentals of Graphic Design

Students will develop foundational skills through exposure to the fundamental principles of graphic design: image-making, typography, composition, and working with colour and shape. This course will cover the relationship between graphic design and marketing and how visual media can affect the online consumer. This course will introduce students to the practical skills needed to design and evaluate marketing materials such as logos, images, and branded content.

Search Engine Optimization

Search engines are an essential part of the online experience. Students will learn how to optimize search engine presence, to ensure their content reaches their target audience, and to monitor the success of keyword selections. Students will analyze traffic, ranking, and conversions, creating a maintenance checklist. SEO strategies across multiple platforms will be discussed and practiced, as learners develop methods to optimize online traffic.

Search Engine Marketing with Google Ads

In this course, students will learn how to use Google Ads, including the Search and Display platforms. Google Ads is a Pay-Per-Click (PPC) platform created by Google to ensure a company is visible on Search Engines and affiliate websites. Additionally, students will be exposed to PPC techniques that will help maximize marketing spending.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

Digital Marketing – Online Full-Time

This full-time program is 20 hours per week

Display Advertising & Mobile Marketing

Display advertising is a powerful marketing tool, strengthened by new platforms like mobile, new video opportunities, and enhanced targeting. In this course, students learn how display advertising works, how it is bought and sold (including in a programmatic environment), and how to set up a display advertising campaign using AdWords by Google.

Online Reputation Management

In this course, students will learn how to build a robust and sustainable online reputation. This course will cover how an online reputation can be created, monitored, improved, and measured as well as how to deal with crises. Students will learn a brief history of social media and difficult lessons that were learned as the technology grew and evolved. Social media will be a key element of this course. Students will be exposed to real-life case studies and discuss how reputations were irreparably damaged, salvaged, and/or resurrected. The importance of a well-trained media relations manager will be stressed.

Search Engine Analytics

Because online activity can be tracked, the overall effect of a company's digital marketing efforts can also be tracked. In this course, students will learn how to use Google Analytics, an essential measurement tool that allows businesses to collect intelligent data and analytics to evaluate their audience, measure the success of acquisition and engagement efforts, evaluate user conversions related to organizational goals, and utilize the information in planning and budgeting.

Career Planning & Preparation - Level I

This module introduces tools for planning and preparing for a successful job search, so that students can maintain a career-focused approach throughout their education program. Students will learn about the "Hidden" Job Market and ways to access it in their upcoming job search, how to research opportunities and network for industry contacts, and use appropriate etiquette when communicating with prospective employers. Students will identify their personal skills, values and preferences for the workplace, begin preparation of a professional resume and references, and organize proof documents for their career portfolio. Class discussions on various self-management topics introduced in Student Success Strategies will round out this module, which is a pre-requisite for Career Planning and Preparation - Level II.

Career Planning & Preparation - Level II

This module continues to build on the concepts and skills introduced in Career Planning and Preparation - Level I. Students will learn how to conduct an effective job search and identify various methods of applying for work with today's technology. Students will create a personal list of "Top Employers" and target current industry opportunities, while finalizing their professional resume, portfolio and career correspondence. Students will learn to identify the different types and forms of interviews, practice responding to typical questions, and practice follow-up, evaluation and negotiation techniques they can use to ensure success. Self-management topics from Career Planning and Preparation - Level I will be reviewed, with a focus towards on-the-job success in both learner placements and post-graduate employment.
