**Interior Decorating**

**PROGRAM OBJECTIVES**

The Interior Decorating program is designed to provide students with comprehensive training for a career in the field of interior decorating and planning for both residential and commercial environments. Through this program, students will learn to analyze client needs and effectively create decorating plans for both the home and office using AutoCAD LT. In addition to studies in the applied areas of interior decorating, students will learn the fundamentals of the business of interior decorating, leading to opportunities for self-employment in this exciting field. This training will also provide graduates with the skills to start their own interior decorating business.

**PROGRAM HIGHLIGHTS**

This program is recognized by DDA Canada (Decorators & Designers Association of Canada) and the Nova Scotia Interior Decorators’ Association (NSIDA). Students receive membership in NSIDA on enrollment.

**CAREER OPPORTUNITIES**

Successful graduates may obtain employment as Interior Decorator Consultants in the Retail/Commercial and Residential fields.

**PREREQUISITES**

If a student does not have Grade 12 or equivalent, he/she must achieve a score of 12 on the Wonderlic Test.

**GRADUATION REQUIREMENTS**

A student must complete all requirements of the Student Success Strategies, Career Planning and Preparation modules, the Field Placement requirements, as well as meeting the attendance requirements as outlined by the Department of Labour and Advanced Education throughout the duration of his/her program.

COURSE DESCRIPTIONS

Student Success Strategies
In this orientation module, emphasis is placed on thinking about achieving success from Day One. This module stresses the importance of developing non-technical skills to enhance personal, academic, and career success. This includes understanding learning styles and honing practical study skills, such as memory, reading, note-and test-taking techniques. Personal exercises will focus on teamwork, decision making and problem solving skills, setting SMART goals and maintaining a positive attitude; techniques for managing change, stress and conflict will also be explored. Students will be evaluated through a variety of assignments, projects, presentations, quizzes and exams in addition to their participation throughout the course.

Software Lab: Computer Fundamentals
Through a combination of theory and hands-on-practice, this module examines the role and use of the computer in today’s workplace. Emphasis is placed on those computers outfitted with the Microsoft Windows operating system. Students will review basic computer concepts, Windows OS usage, and complete hands-on training exercises in business-standard software applications, including Microsoft Outlook and Microsoft Word. Keyboarding skills are also honed via daily keyboarding exercises and drills. Students will be evaluated through a variety of assignments, projects, quizzes and exams in addition to their participation throughout the course.

Software Lab – Word Fundamentals
This course consists on online training and assessment in Microsoft Word, and builds on the skills first introduced in Computer Fundamentals. Focus is on basic Word Processing skills, with emphasis on formatting text and paragraphs, inserting and modifying tables, inserting and modifying pictures, header and footer content, and page set-up features. Students will be evaluated through a variety of assignments, projects, quizzes and exams in addition to their participation throughout the course.

Software Lab – Excel Fundamentals
This course consists on online training and assessment in Microsoft Excel. Focus is on spreadsheet basics, with emphasis on creating, formatting and printing worksheets, creating formulas, sorting and filtering data, creating and modifying charts, and using basic mathematical and logical functions. Students will be evaluated through a variety of assignments, projects, quizzes and exams in addition to their participation throughout the course.

Theory 1: Understanding Interior Decorating, Design Fundamentals, and Colour
This module introduces to the profession of Interior Design and the science that drives design thinking. The Concept and Design Process are introduced and the Scope of Services are explored, Allied Trades people are discussed. Health, Safety, and Welfare of interior spaces is discussed. The students explore the science of Spatial Behaviour (Anthropometrics, Proxemics, and Ergonomics), Universal Design, and Historic Preservation. It also introduces the Elements and Principles of Design, and begins their training in Colour Theory.

Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.
**Interior Decorating**

**Theory 2: Building Systems & Space Planning**
This module builds on the knowledge the students obtained in Theory 1. The students explore Building Systems, Construction Components and Process. Lighting Electrical and Communications systems are introduced. The students begin their study of Space Planning, first learning how furnishings function within individual rooms and then how those rooms interact with each other in the built environment.

**Theory 3: Materials, Furnishings, and Fabrics**
This module expands and builds on the knowledge obtained in prior theory modules. The students learn about the Materials, Furnishings, and Fabrics available to them. Textiles, Flooring, Wall Coverings, Window Treatments, Accessories, and Art are fully explored.

**Practical 1: Elements & Principles of Decorating**
This module complements the decorating theory and history subjects and provides students with practical application of theory and skills developed. Students are also exposed to local decorating supply stores and their products, and to people working in the decorating industry.

**Practical 2: Elements & Principles of Decorating**
This module is designed to give the student hands-on practice and training for designing interior rooms of homes. It allows the student to take into account every aspect necessary to determine what is required to make changes to a room and also to know what questions are needed to ask the client regarding changes made to the room. This module also introduces the student to various field trips to local buildings to see hands-on what products are offered to the Interior Decorating profession and to see how buildings have changed over the years.

**Practical 3: Elements & Principles of Decorating**
This module is designed to give the student extensive knowledge on how to prepare design boards for different aspects of a home or business, i.e. Living room, dining room, etc. The students will visit various local vendors to get an insight on how a room should look. Preparing a portfolio will also be utilized to give students experience with local employers and get a view of what people are looking for in decorating or renovating their home or business.

**History of Interior Decorating and Furniture**
This module provides the students with an historical overview of the development of interior design and furniture and how it impacts the development of current trends in the decorating field. Students learn the evolution of space planning, interior architecture, decorative detail and furniture design. The following periods are covered: Egypt 3200-341 BC, Greece 500-30 BC; Rome 504 BC-AD 476; Middle Ages 1150-1550; Italian, French, and English Renaissance 1460-1660; Italian, French and English Baroque 1600-1701; French Rococo 1700-1760. Students will be evaluated through a variety of assignments, projects, presentations, quizzes and exams in addition to their participation throughout the course.

**Allied Skills & Fundamentals**
This module offers a series of introductory lessons with tips on and introductions to various allied subjects related to Interior Decorating and Design: Floral Design, Event Planning, Visual Display, Photography and Photo composition, Microsoft Publisher and Microsoft Teams.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time, pending approval of the Department of Labour and Advanced Education. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

Rev 0518 INDEC NB
Introduction to Perspective Drawing and Drafting

Students will develop basic skills in perspective drawing and understand the application of the skill to the field of interior decorating. This module provides a general introduction to materials and tools, proportion, spatial depth and shading techniques, using perspective on interior drawings, line, shape, value, and texture, as well as interior decorating specific techniques of drawing furniture styles and drawing a floor plan to scale.

AutoCAD for Interior Decorators 1

This module introduces Computer Aided Drafting (CAD) using AutoCAD. There is a presentation of basic CAD operations through lecture and demonstration, followed by training with extensive hands-on, in-class drawing exercise sessions in a computer lab and the application of CAD operations in the creation of two-dimensional drawings.

AutoCAD for Interior Decorators 2

Picking up where AutoCAD for Interior Decorators 1 finishes, this module provides a presentation of intermediate level CAD operations through lecture and demonstration, followed by training with extensive hands-on, in-class drawing exercise sessions in a computer lab and the application of CAD operations in the creation of two-dimensional drawings.

Marketing for Interior Decorators

Students will gain a better understanding of the marketing function and marketing plans as related to small business within the interior decorating/design field. Students will have a better understanding of the various tools at their disposal to help successfully promote their business. Students will be evaluated through a variety of assignments, and projects in addition to their participation throughout the course.

Entrepreneurial Studies

This module will introduce learners to the skills and information needed by Interior Decorators, including an introduction to entrepreneurship, different forms of business, preparing a professional business plan, and the different career progressions available to them as well as Ethics and Forecasting for the profession.

Career Planning and Preparation Level I

This module introduces tools for planning and preparing for a successful job search, so that students can maintain a career-focused approach throughout their education program. Students will learn about the "Hidden" Job Market and ways to access it in their upcoming job search, how to research opportunities and network for industry contacts, and use appropriate etiquette when communicating with prospective employers. Students will identify their personal skills, values and preferences for the workplace, begin preparation of a professional resume and references, and organize proof documents for their career portfolio. Class discussions on various self-management topics introduced in Student Success Strategies will round out this module, which is a pre-requisite for Career Planning and Preparation - Level II.

An introduction to Occupational Health and Safety will also be discussed, specifically the definition of occupational health and safety; an individual’s safety rights; responsibilities under Nova Scotia law; hazard identification and control; WHMIS, First Aid and fire safety requirements. Students will be evaluated through a variety of assignments, projects, and quizzes in addition to their participation throughout the course.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time, pending approval of the Department of Labour and Advanced Education. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.
Career Planning and Preparation Level II

This module continues to build on the concepts and skills introduced in Career Planning and Preparation - Level I. Students will learn how to conduct an effective job search and identify various methods of applying for work with today's technology. Students will create a personal list of "Top Employers" and target current industry opportunities, while finalizing their professional resume, portfolio and career correspondence. Students will learn to identify the different types and forms of interviews, practice responding to typical questions, and practice follow-up, evaluation and negotiation techniques they can use to ensure success. Self-management topics from Career Planning and Preparation - Level I will be reviewed, with a focus towards on-the-job success in both learner placements and post-graduate employment. Students will be evaluated through a variety of assignments, projects, and quizzes in addition to their participation throughout the course.
