

PROGRAM OBJECTIVES

The Pharmacy Assistant Diploma Program combines instructor led training with a work placement designed to prepare students for a career in healthcare. The Pharmacy Assistant provides services and assistance to pharmacists and pharmacy technicians by compounding, packaging and labeling pharmaceutical products and by maintaining prescription records and inventories of medications and pharmaceutical products.

The purpose of the program is to prepare students with the necessary skills and academic knowledge for entry-level positions in retail pharmacies as well as pharmaceutical companies.

This program provides an overview of the theory, principles and practices of the Pharmacy Assistant. Areas of study include accurately and safely processing prescriptions, pharmacy software practice, proper extemporaneous compounding techniques, controlling inventory, keeping accurate and confidential records, third-party billing, acting within relevant legislation and effectively communicating verbally and in writing.

CAREER OPPORTUNITIES

As a Pharmacy Assistant, you'll work as part of a health care team to ensure that consumers receive the best possible pharmaceutical care. Graduates of the Eastern College Pharmacy Assistant program may work in retail pharmacies, home healthcare divisions/companies, insurance companies, institutional settings and pharmaceutical distribution wholesalers/manufacturers.

PREREQUISITES

1. Student has Grade 12 or equivalent or meets criteria for Mature Student Status.
2. Mature students must be 19 years of age, pass a qualifying test, and provide a Letter of Intent OR resume that supports their skills and aptitudes to be successful in the program.
3. The approved qualifying test for this program is the Wonderlic test. A passing score for this program is 14.

GRADUATION REQUIREMENTS

A student must obtain an overall grade, in each module of at least 70% in order to graduate and receive a diploma. A student must complete all requirements of Student Success Strategies as well as the field experience requirements.

PROGRAM OVERVIEW

Courses	Hours
Student Success Strategies	20

COURSE DESCRIPTIONS

Student Success Strategies

In this orientation module, you will focus on achieving success from day one. You will develop non-technical skills to enhance your personal, academic, and career success. You will explore learning styles, including visual, auditory, and kinesthetic learning. You will also enhance your practical study skills, such as memory, reading, note- and test-taking techniques. Personal exercises will focus on teamwork, decision-making and problem-solving skills, setting SMART goals, and maintaining a positive attitude. You will also explore techniques for managing change, stress, and conflict.

Digital Literacy for Professionals

This course has four units that introduces you to the fundamental concepts and principles of learning and working in a digital environment. The first unit introduces you to using devices and handling information with topics on operating systems (Windows, MAC, and Linux), computer organization (folder management and naming conventions), cloud storage (including Microsoft OneDrive), types of web browsers including Google Chrome, Mozilla Firefox, and Apple Safari), and fundamental troubleshooting. In the second unit, you will become familiar with creating and editing information through learning about file formats (pdf, mp4, docx), productivity (including iWork and Microsoft Office Suite) and creativity (Adobe, Canva, iMovie) platforms, and basic introduction to Microsoft Word, Excel, and PowerPoint. The third unit on communicating and collaborating will introduce you to web conferencing applications (Slack, Zoom, Microsoft Teams), mail applications (including Microsoft Outlook and Gmail), project management tools (Trello, Asana), and time management tools (including Todoist, Outlook Calendar, and iCal), and building rapport virtually. In the final unit, you will gain an understanding on netiquette, cybersecurity, and digital wellness. After completing this course, you will have enhanced digital literacy skills as a professional in the working and learning environment.

Anatomy, Physiology and Terminology

This course will introduce the foundations of the language of medicine and will develop medical vocabulary through the study of the structures and functions of the major body systems. Topics include medical terminology; general body organization; and the skeletal, muscular, cardiovascular, lymphatic, immune, respiratory, digestive, urinary, nervous (including special senses and psychiatric disorders), integumentary, endocrine, and reproductive systems.

Pharmacy Mathematics

This course begins with a review of basic mathematics and its application to pharmacy calculations. Mathematics used in retail pharmacies, namely: business math; prescription pricing; and calculating medication dosages, are studied in this course. In order to prepare the student for a wide range of pharmacy settings, calculations used in specialized and institutional pharmacies are also discussed.

Pharmacy Compounding

This course is an introduction to drug preparation and dosage forms. Students will gain an understanding of ingredients used in preparing pharmaceutical products. Students will gain knowledge and hands-on experience in non-sterile compounding. This course involves the application of both pharmacy math and pharmaceutical abbreviations in the compounding and dispensing of medications.

Pharmacy Law and Ethics

This course offers students the opportunity to learn about both Federal and Provincial legislation that governs pharmacy in Canada today. A solid understanding of jurisprudence (pharmacy law) is essential for Pharmacy Assistants to perform well in the field of pharmacy. The New Brunswick Pharmacy Act as it relates to pharmacy and third-party billings will be discussed in detail. This course will also introduce students to ethical concerns that are becoming increasingly important in pharmacy and health care in general.

Pharmacy Assistant

Pharmacology

This course will introduce the basics of pharmacology and include a review of physiology and the basic mechanisms of action involved in diseases/disorders of body systems. Students will learn to distinguish between the trade names and generic names of drugs and identify classifications of drugs used in the treatment of diseases and disorders.

Community Pharmacy for Pharmacy Assistant

This course will introduce students to the roles and responsibilities of pharmacists and pharmacy assistants. It will also teach students the procedures to prepare and dispense medications, which include prescription interpretation skills, billing and inventory, as well as medication safety. This course also addresses professionalism, work ethics and communication in the workplace. Students will train with Telus Health Solutions' Kroll computerized dispensary system. Using Kroll, students will enter patient and doctor information, generate labels, fill medical prescriptions, and generate pharmacy reports.

St. John Ambulance Standard First Aid/Heartstart Training

This module introduces participants to intermediate first aid techniques and to Level C cardiopulmonary resuscitation. This training is ideal for medical workers and anyone requiring a strong foundation for future First Aid training.

Career Planning & Preparation - Level I

This module will introduce you to and provide practice in using the tools required for a successful job search. The concepts covered in this module will help you maintain a career-focused approach throughout your studies so that you are better prepared to conduct a job search after graduating. Specifically, you will learn how to identify your soft and hard skills and how to articulate your abilities in a clear and concise Elevator Pitch that will appeal to employers and resonate with industry contacts. You will learn about the job search resources available to you including using career websites, creating Linked In profiles, accessing the "hidden" job market, and networking. You will examine sample resumes and cover letters and begin the process of creating your own professional resumes and cover letters that align with current conventions for content, organization, and formatting. You will also learn about the role of references, thank you letters, workplace philosophies, and strategies for success including maintaining a professional image and using proper etiquette when communicating with potential employers and industry contacts.

An introduction to Occupational Health and Safety is also provided with specific focus on employees' rights and responsibilities, workplace health and safety policy and programs, hazard identification and control, and safety training options such as WHIMIS and First Aid.

Career Planning & Preparation - Level II

This module builds on concepts and skills introduced in the Career Planning and Preparation Level 1 prerequisite module. In this subsequent module, you will update and refine your resume and LinkedIn Profile. You will continue writing cover letters and learn the value of customizing cover letters to specific job postings. You will have the opportunity to apply this knowledge as you conduct a job search and write a cover letter tailored to an ideal job post. Through research, you will create a list of top employers and target current industry opportunities. You will learn about current methods for applying to job postings using technology. You will also gain an understanding of the job interview process, typical interview questions and possible responses, and expectations of both the interviewer and interviewee. In addition, you will engage in practical application of the interview process through role-plays. Topics such as negotiating salary, self-management, and on-the-job success for placements and post-graduate employment will be also covered.

Pharmacy Assistant Field Placement

The field placement component of the program is the practical application of a student's knowledge and skills in an industry environment. The focus of the field placement is within a retail pharmacy to emphasize a customer-centered approach; therefore, the field placement is not within a hospital setting. The duration of the field placement is 6 weeks, during which the student must satisfactorily complete a minimum of 200 hours of work experience.
