

PROGRAM OBJECTIVES

The Pharmacy Technician diploma program will provide the student with the required knowledge base, and practical “hands-on” skills necessary to pursue licensure as a Pharmacy Technician.

Students gain knowledge relevant to the technical and clerical aspects of the pharmacy profession including inventory maintenance, record keeping, pharmacy equipment, device demonstration, mathematical skills related to pharmacy, compounding, and prescription preparation in both hospital and community pharmacies.

*The Pharmacy Technician Program of the Halifax Campus has been granted **Accreditation Status** by The Canadian Council for Accreditation of Pharmacy Programs for a five-year period from July 2022 to June 2027.*

CAREER OPPORTUNITIES

Upon successful completion of the program, the graduate will have met the academic requirements necessary to pursue licensure as a Pharmacy Technician. Successful completion of additional exams through PEBC.ca as well as a postgrad structured practical experience program and a provincial jurisprudence exam are also required prior to licensure in Nova Scotia.

PREREQUISITES

1. Student has Grade 12 or equivalent.
2. Student must provide proof of completion of Grade 11 and/or 12 Math, English, Chemistry, and Biology.
3. Student must provide a current Immunization Record (based on Nova Scotia Health Authority standards).
4. Student must provide a clear Criminal Record Check.
5. Student must meet language proficiency requirement as per the National Association of Pharmacy Regulatory Authorities (NAPRA).

GRADUATION REQUIREMENTS

In order to graduate and receive a diploma, a student must obtain an overall grade of at least 70% in each module. As a requirement of accreditation, an exception to this is Pharmaceutical Calculations II, where a grade of 100% is required. Additionally, students must complete all requirements of Student Success Strategies, the Field Placements, and any 3rd party certifications detailed below in addition to meeting the attendance

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time, pending approval of the Department of Labour and Advanced Education. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

requirements as outlined by the Department of Labour and Advanced Education throughout the duration of their program.

The Field Placement for Pharmacy Technician is the last module you will complete in your program before graduating. This module is 8 weeks in length and a minimum of 40 hours must be completed each week. We highly recommend that you treat this module as a job and complete as many hours as possible with your Host Site.

PROGRAM OVERVIEW

Core Courses	Hours
Introduction to Pharmacy for Pharmacy Technician*	50
Pharmaceutical Fundamentals*	75
Pharmaceutical Calculations I*	100
Field Placement I - Pharmacy Technician (Part-time)***	40
Anatomy and Physiology for Pharmacy Technician*	125
Pharmacology for Pharmacy Technician*	125
Hospital Pharmacy for Pharmacy Technician I*	75
Hospital Pharmacy for Pharmacy Technician II*	75
Preparation of Extemporaneous Mixtures for Pharmacy Technician*	75
Community Pharmacy for Pharmacy Technician*	175
Pharmaceutical Calculations II*	25
Comprehensive Review for Pharmacy Technician*	50
Professional Skills for Pharmacy Technician	80
Field Placement II - Pharmacy Technician (Full-time)	320
Additional Courses	Hours
Student Success Strategies	20
Career Planning & Preparation Level I	20
CPR and First Aid/WHMIS	20
Career Planning & Preparation Level II	20
TOTAL WEEKS (without breaks)	54
TOTAL WEEKS (with maximum** break weeks)	60

*Classes in these modules run 5 hours per day, 5 days per week. Field Placement weeks require an average of 40 hours.

**Number of study breaks depend on intake start date.

***The 40-hour placement must be completed on a part-time basis, after the end of Calculations 1 and before the start of Comprehensive review.

COURSE DESCRIPTIONS

Student Success Strategies

Instructor Led

In this orientation module, you will focus on achieving success from day one. You will develop non-technical skills to enhance your personal, academic, and career success. You will explore learning styles, including visual, auditory, and kinesthetic learning. You will also enhance your practical study skills, such as memory, reading, note- and test-taking techniques. Personal exercises will focus on teamwork, decision-making and problem-solving skills, setting SMART goals, and maintaining a positive attitude. You will also explore techniques for managing change, stress, and conflict.

Introduction to Pharmacy for Pharmacy Technician

Instructor Led

In this course, you will examine the history of pharmacy and how it has evolved to the level of pharmaceutical care present today. You will explore in detail, the role of the Pharmacist and the Pharmacy Technician and their scope of practice. You will also examine the steps to complete the licensing process. You will practice common terminology and abbreviations used in a pharmacy as well as accessing and utilizing common pharmaceutical references, including the Compendium of Pharmaceuticals and Specialties (CPS). You will also explore the federal and provincial laws, rules and regulations that govern the practice of pharmacy, such as the role of Health Canada, the Narcotic and Controlled drug laws, and the Food and Drug Act. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Pharmaceutical Fundamentals

Instructor Led

In this module, you will develop a solid knowledge of the terminology used in pharmacy. You will explore the language and parts of a prescription in detail. You will explain common dosage forms and their administration, such as oral solid, oral liquid, topical, rectal/vaginal, parenteral, inhalation, ophthalmic, otic, and nasal and be able to compare the advantages and disadvantages of each. You will examine guidelines and procedures for maximizing drug stability, and the important role they play in maintaining it. You will also explore the clinical, scientific, economic, and educational aspects of pharmacy, along with application of the CPS and Provincial Drug Formulary. Accuracy and attention to detail will be stressed in this module. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Anatomy and Physiology for Pharmacy Technician

Instructor Led

In this module, you will explore the structure and function of the human body to understand the effects of drugs. You will explore body systems, such as muscular, skeletal, cardiovascular, and nervous systems, one at a time and will learn how each system interacts with the other body systems. You will also define common medical terminology and explain common medical conditions that may affect the various body systems, including cancer and psychiatric disorders. You will describe different types of cancer treatment and therapeutic treatment options for psychiatric disorders. This module prepares you to understand how medications impact disease processes in the body. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Pharmacology for Pharmacy Technician

Instructor Led

In this module you will explore a range of drugs and diseases associated with each body system. You will build on your previous experience of pathological conditions and examine different medications for their treatment. You will explore the proper use of medications and how they work in the body. You will also list various drug categories and the proper use and common side effects of them. It is important to stress that pharmacology is a very large topic, and we will only scratch the surface in this module. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time, pending approval of the Department of Labour and Advanced Education. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

PHARMACY TECHNICIAN

Pharmaceutical Calculations I

Instructor Led

In this course, you will begin with a review of basic mathematics and its application to pharmacy calculation, including Roman numerals and Arabic numbers, fractions, and ratios. You will complete different types of calculations that are performed in a pharmacy on a daily basis, such as calculating medication dosages and quantity of ingredients for compounding. You will perform calculations that are typical of those used in both hospital and community pharmacies. You will also explain apothecary and household measurements and convert between various units of measurement and systems of measurement. You will accurately interpret drug orders and properly read drug labels. By completing this module, you will be prepared for a wide range of pharmacy settings. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Preparation of Extemporaneous Mixtures for Pharmacy Technician

Instructor Led

Over the course of this module, you will compound a minimum of twenty products. You will explain the concept of pharmaceutical elegance with reference to a finished prescription product and describe the national and provincial guidelines for standards of compounding. By completing this module, you will develop the necessary competence to prepare common extemporaneous mixtures. You will apply skills of good organization, accuracy, cleanliness, quality control, and efficiency throughout the module. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Hospital Pharmacy for Pharmacy Technician I

Instructor Led

In this module you will explore the health care system and the role of the hospital within it. You will examine the structure and organization of the hospital, focusing on the relationship of the pharmacy department with other departments and services. You will also explore the intricacies of the pharmacy department in detail, including the mission statement, the various roles of pharmacy personnel, confidentiality, and security. You will also explain the various methods of drug distribution, inventory control, and record keeping. You will describe medication reconciliation and methods used in obtaining a best possible medication history (BPMH). This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Hospital Pharmacy for Pharmacy Technician II

Instructor Led

In part 2 of the hospital module, you will focus on sterile techniques and proper methods of preparing IV products. You will apply calculations learned in previous modules. You will explore equipment and practice proper procedures. You will demonstrate competency in all aspects of preparation including proper gowning procedure and cleaning of hoods as well as preparing different types of sterile products. Attention to detail will be stressed in this module. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Community Pharmacy for Pharmacy Technician

Instructor Led

Upon completion of the module, you will be proficient in all common aspects of community-based pharmacy operations. You will examine the general operations and specialized activities performed in a community pharmacy setting. You will practice the necessary techniques to prepare, dispense, calculate, compound, and label. You will explore record keeping functions, billing, inventory management, and third-party insurance claim processing. You will demonstrate the responsibilities of a pharmacy technician using the campus' pharmacy computer program. You will apply skills of good customer service, telephone courtesies, professional relationships, confidentiality, security, and other aspects of professionalism throughout this module. You will also apply your knowledge of materials and equipment used daily in the pharmacy, along with dispensary hygiene and maintenance procedures. You will explore specialized areas of community pharmacy, such as nursing home services, specialty compounding services, and diagnostic tests provided in community-based pharmacies. You will examine specialized products, including ostomy, incontinence, orthopedic, and diabetic supplies. You will also examine specialized services, such as compliance packing, pharmacist prescribing, health days, vaccination campaigns, prescription delivery services, methadone service, home health care supplies and rentals. You will

PHARMACY TECHNICIAN

explore various OTC medications, including OTC narcotics and common herbal products. You will demonstrate your competence in filling and checking prescriptions and device demonstration/training. This module is mapped to the NAPRA Professional Competencies for Canadian Pharmacy Technicians at Entry to Practice.

Pharmaceutical Calculations II

Instructor Led

In this module you will review all calculations covered in the program. You will review and practice a range of calculations and prescription checking with an aim for 100% accuracy in all work. You will apply your skills of prescription checking and the different types of calculations used in pharmacy practice. On the last day of the module, you will write an “Entry to Practice” exam, which is marked under zero tolerance policy parameters, a requirement of any accredited Canadian Pharmacy Technician program.

Comprehensive Review for Pharmacy Technician

Instructor Led

In this module, you will review all aspects of the pharmacy technician program, including narcotic and controlled drug regulations, the Compendium of Pharmaceuticals and Specialties (CPS), pharmaceutical dosage forms/routes of administration, pharmaceutical calculations, medical terminology, anatomy and physiology, common drugs, hospital pharmacy procedures and techniques, community pharmacy procedures and the pharmacy computer system. You will also prepare for the provincial jurisprudence exam.

CPR and First Aid/WHMIS

Instructor Led

In this module, you will complete several certifications/trainings. The CPR component provides you with comprehensive CPR training. It includes the latest first aid and CPR guidelines and meets federal and provincial regulations for Standard First Aid and CPR. Topics include preparing to respond; the EMS system; check, call, care; airway emergencies; breathing and circulation emergencies; first aid for respiratory and cardiac arrest; wound care; head and spine injuries; bone, muscle and joint injuries; sudden medical emergencies; environmental emergencies; and poisons. The WHMIS component teaches you the basic elements of WHMIS 2015 and the Global Harmonization System. This covers the safety measures and guidelines to be followed when exposed to or working with hazardous materials.

Professional Skills for Pharmacy Technician

Instructor Led

In this module you will acquire the professional skills necessary for success in today’s health care environment. You will examine the role, knowledge, and skills of your profession as well as those you will be working with during your career. You will get the opportunity to interview a health care professional in a current role to improve your intra and interprofessional collaboration skills. You will also explore key elements of professionalism and why it is important to all involved in the health care environment. You will identify the factors involved in developing a strong work ethic and how they relate to you. You will also explore the elements of self-care, such as managing change and time and stress management techniques. You will explore the elements of a successful practicum, including the benefits, preparation, and proper etiquette to ensure a successful field placement. By completing this module, you will develop your professional skills and improve your confidence to succeed in any health care setting.

Career Planning and Preparation Level I

Instructor Led

This module will introduce you to and provide practice in using the tools required for a successful job search. The concepts covered in this module will help you maintain a career-focused approach throughout your studies so that you are better prepared to conduct a job search after graduating. Specifically, you will learn how to identify your soft and hard skills and how to articulate your abilities in a clear and concise Elevator Pitch that will appeal to employers and resonate with industry contacts. You will learn about the job search resources available to you including using career websites, creating Linked In profiles, accessing the “hidden” job market, and networking. You will examine sample resumes and cover letters and begin the process of creating your own professional resumes and cover letters that align with current conventions for content, organization, and formatting. You will also learn about the role of references, thank you letters, workplace

Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.

PHARMACY TECHNICIAN

philosophies, and strategies for success including maintaining a professional image and using proper etiquette when communicating with potential employers and industry contacts.

An introduction to Occupational Health and Safety is also provided with specific focus on employees' rights and responsibilities, workplace health and safety policy and programs, hazard identification and control, and safety training options such as WHIMIS and First Aid.

Career Planning and Preparation Level II

Instructor Led

This module builds on concepts and skills introduced in the Career Planning and Preparation Level 1 prerequisite module. In this subsequent module, you will update and refine your resume and Linked In Profile. You will continue writing cover letters and learn the value of customizing cover letters to specific job postings. You will have the opportunity to apply this knowledge as you conduct a job search and write a cover letter tailored to an ideal job post. Through research, you will create a list of top employers and target current industry opportunities. You will learn about current methods for applying to job postings using technology. You will also gain an understanding of the job interview process, typical interview questions and possible responses, and expectations of both the interviewer and interviewee. In addition, you will engage in practical application of the interview process through role-plays. Topics such as negotiating salary, self-management, and on-the-job success for placements and post-graduate employment will be also covered.

Field Placement I - Pharmacy Technician

Offsite Work Placement

On successful completion of the introductory classroom modules of this program, you will be required to complete 40 hours of field placement. You will apply the skills necessary to be successful in the field. You will complete the 40 hours on a part-time basis over the remainder of the program during off class hours on a schedule to be worked out between you and the preceptor. You will be required to submit a record of hours signed by the preceptor to verify the hours were obtained. Placement sites will be arranged and approved by the program coordinator and schedules worked out between you and the preceptor.

Field Placement II - Pharmacy Technician

Offsite Work Placement

On successful completion of the classroom hours of this program, you will be placed on field placement. You will explore the relevant technical and clerical aspects of the pharmacy including inventory maintenance, record keeping, and specialized pharmacy equipment. You will build on the skills learned in the classroom and demonstrate your ability to meet the NAPRA Competencies for Canadian Pharmacy Technicians at Entry to Practice over a period of 8 weeks consisting of 4 weeks (160 hours) in a community pharmacy and 4 weeks (160 hours) in a hospital pharmacy.

NOTE: In order to continuously improve our programs, Eastern College reserves the right to modify programs at any time, pending approval of the Department of Labour and Advanced Education. Program delivery order may vary depending on program start date. This diploma program may not be available at all campuses.
